RE: MARIN RESOURCE RECOVERY CENTER
RECYCLING CERTIFICATION

To Whom It May Concern:

The Marin Resource Recovery Center (MRRC), in San Rafael, California, is a Material Recovery Facility that accepts mixed construction and demolition loads, as well as many other types of materials. All incoming loads are sorted and processed to remove recyclable materials.

MRRC provides quarterly reports to the Marin County Hazardous and Solid Waste Joint Powers Authority that are used by that agency for state reporting requirements. Attached is the most recent submission for the 4th quarter of 2017. A total of 61,773 tons were received by the facility during the quarter. 36,160 tons were removed from the waste stream and recycled, and 25,613 tons were landfilled. This equates to a recycling rate of 58.5%.

Due to an equipment malfunction in early November 2107, we have included fines in our MSW calculation in Q4. This puts pressure on the recycling rate % in Q4. We have addressed the issue and the new equipment should be delivered and installed by April/May 2018. Therefore, you will also see downward pressure on the recycling rate in Q1 2018. However, moving forward from Q2 2018 we project our recycling rate to increase to its historical levels.
